Health Department Extends Hours Dec. 1 for HIV Testing

FAYETTEVILLE, NC – In recognition of World AIDS Day on Dec. 1, the Cumberland County Public Health Department will operate beyond traditional hours to provide free and confidential HIV testing only from 5-7 p.m.

This is a special clinic being offered and the public is encouraged to take advantage and learn their status. Get real; get tested; get treated; and get involved.

The first 25 people tested will receive a special gift. Everyone is invited to show your support for World AIDS day by wearing red on Dec. 1. For more information contact Robyn Johnson, CDC disease intervention specialist II, at 910-433-3782.
