## **County Adds Online Tax Parcel Viewer, Polling Place Finder To Website**

FAYETTEVILLE, NC – The Cumberland County Government website has two new mapping applications. The public can now locate tax parcels and find their polling places through these online features available at <http://gis.co.cumberland.nc.us>.

The **Tax Parcel Viewer** provides property tax and assessment information. It also includes information on nearby schools and Internet broadband availability. This application can be used on a desktop computer, a laptop, mobile phone or tablet device. Citizens can perform searches by tax parcel number, specific address or property owner's name.

The **Polling Place Finder** is an interactive map of all Cumberland County Board of Elections polling places. This application helps citizens locate their election polling place, comment on the conditions at the polling place, and obtain information about current elected officials.

“The new Geographical Information Systems (GIS) website replaces the old one with newer technology,” said Mary Ann Steinmetz, Cumberland County GIS Coordinator. “This update makes it compatible with many different types of browsers.”

For more information, call the GIS division of the Cumberland County Geographic Information System department at 910-323-6119.
