## Engineering & Infrastructure Director Appointed To National Committee

FAYETTEVILLE – Cumberland County Engineering and Infrastructure Director Jeffery Brown has been appointed to the American Public Works Association Facilities and Grounds Committee. Brown's one-year appointment took effect March 21.

The committee serves as a center of expertise for APWA relating to facilities management and grounds maintenance within public works. The committee meets monthly by conference call and twice per year in person. Brown was appointed because of his expertise in the subject matters assigned to the Facilities and Grounds Committee, a press release from the APWA said.

"I've been a member of the APWA for eight years and I consider it an honor to serve this great organization," Brown said. "I hope the experience will give me an opportunity to see what other professionals across the country are doing to bring innovative ideas to public works."

Brown has been the county's engineering and infrastructure director since April 2012. His professional experience includes eight years with the City of Fayetteville, during which time he served as Engineer II, City Engineer, and then Engineering and Infrastructure Director. Prior to working for the city, Brown spent five years with the NC Department of Environment and Natural Resources as an environmental engineer.
