Cat Found In Cumberland County Tests Positive For Rabies

FAYETTEVILLE – The State Public Health Lab in Raleigh reported positive results today for rabies in a cat picked up Dec. 16 on Hayfield Drive, off Wade-Stedman Road, in Wade.

The sick stray cat showed up at a home on Dec. 13. The residents' two dogs tried to attack it, and when one of the individuals tried to intervene, he was bitten by one of the dogs. The residents took the cat indoors where they cared for it until Dec. 15 when they took the cat to a veterinarian who immediately advised them the animal showed neurological signs of rabies.

Animal Control was contacted and the cat was picked up for testing. The two exposed dogs and other family pets were all up to date on rabies vaccinations, and the family has been advised to seek medical treatment.

This is the 12th case of rabies in the county for 2014.

All pet owners are urged to check the vaccination status of their pets. If pets are not vaccinated or are due for a booster shot, they should be taken to a local veterinarian for rabies vaccination immediately.

The first sign of rabies in animals is a change in behavior. Animals may become aggressive, attacking for no reason, or they may become very quiet. Wild animals can lose their fear of people and act tame. Rabid animals may walk in a circle, drag a leg, or fall over. Some cannot swallow so they are not able to eat or drink and often drool. Animals usually die within a week after first becoming ill.

Avoiding wild animals and keeping your distance from stray dogs and cats is the first step in preventing an animal bite. Any pet, which appears to have been in a fight while outside, should be handled very cautiously and seen by a veterinarian.

If you are bitten or scratched by an animal:

- Immediately wash the wound under running water for at least 10 minutes with lots of soap. Seek medical attention/advice.
- Call Animal Control at 321-6852 Monday-Friday 8 a.m. to 5:30 p.m. Call the Sheriff's Office at 323-1500 after 5 p.m., weekends and holidays.
- Go to the emergency room.

-more-

It is also important to vaccinate your pets for rabies and keep their shots current. Pet owners are reminded that all dogs and cats must be vaccinated against rabies, as required by state law. Pet owners are subject to a fine of \$100 for each unvaccinated dog or cat. Pets must be vaccinated when they reach the age of four months.
