## Fox Tests Positive For Rabies After Approaching Two People

FAYETTEVILLE - The State Public Health Lab in Raleigh reported positive rabies results this morning in a fox picked up May 13 on Trout Creek Road, off Cliffdale Road. The fox attempted to attack two people at two different addresses within close proximity.

The fox approached a person at Kings Lynn Loop who was checking for mail. The animal attempted to bite the man's ankle, but did not break the skin. The fox then attempted to bite a woman as she was walking to her car on Trout Creek Road. Animal Control captured and euthanized the fox so it could be tested for rabies. Both individuals have been notified to seek medical advice. Animal Control officers are in the area alerting citizens.

This is the fifth case of rabies in the county for 2015.

**All pet owners are urged to check the vaccination status of their pets. If pets are not vaccinated or are due for a booster shot, they should be taken to a local veterinarian for rabies vaccination immediately.**

The first sign of rabies in animals is a change in behavior. Animals may become aggressive, attacking for no reason, or they may become very quiet. Wild animals can lose their fear of people and act tame. Rabid animals may walk in a circle, drag a leg, or fall over. Some cannot swallow so they are not able to eat or drink and often drool. Animals usually die within a week after first becoming ill.

Avoiding wild animals and keeping your distance from stray dogs and cats is the first step in preventing an animal bite. Any pet, which appears to have been in a fight while outside, should be handled very cautiously and seen by a veterinarian.

If you are bitten or scratched by an animal:

- Immediately wash the wound under running water for at least 10 minutes with lots of soap. Seek medical attention/advice.
- Call Animal Control at 321-6852 Monday-Friday 8 a.m. to 5:30 p.m. Call the Sheriff's Office at 323-1500 after 5 p.m., weekends and holidays.
- Go to the emergency room.

It is also important to vaccinate your pets for rabies and keep their shots current. Pet owners are reminded that all dogs and cats must be vaccinated against rabies, as required by state law. Pet owners are subject to a fine of \$100 for each unvaccinated dog or cat. Pets must be vaccinated when they reach the age of four months.
